Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Eberle (U.S. patent No. 4,225,037).

Eberle shows a conveyor apparatus with a plurality of carriers 100, 102. . . 130 arranged to convey objects, a driving mechanism that drives the plurality of carriers in conjunction with each other, and a driving source 300 that exerts a driving force onto the driving mechanism. The plurality of carriers each have a sprocket 428 that is disposed in series to rotate coaxially with and together with the carriers around an axial line 200, 202...230 extending substantially horizontally. The driving mechanism includes the sprockets 428, an endless chain 400 wound onto the plurality of sprockets, and a chain guide formed by two wear strips 430 and 432 disposed adjacent to the chain so as to sandwich the chain from an outer periphery thereof in upward and downward directions. The chain guide wear strips are replaceable and therefore detachably attached to the frame supporting the carriers and they are made of a plastic material which is softer than the chain 400 and which are replaceable. Thus Eberle shows all the structure required by claims 1-7.

Art Unit: 3651

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The cited prior art not discussed above show arrangements of conveyors with chain guides that are similar to that of the present invention.

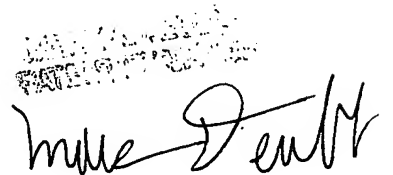

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark A. Deuble whose telephone number is (571) 272-6912.

The examiner can normally be reached on Monday through Friday except for alternate Fridays.
